[Luxion Floating License Server Transfer Policy](#)

For customers that wish to transfer their KeyShot floating license server, an active annual maintenance contract must be in place.

If a customer does not have an active annual maintenance contract they must upgrade their floating license + add annual maintenance.

This must be paid and processed before a license transfer can take place.

[This policy applies to customers who wish to transfer their floating license servers after May 16, 2022.](#)
