Model: MV-J110

AED Trainer

No.	Contents	Quantity	Unit	Remark
1	Main body	1	PC	
2	Remote control	1	PC	
3	Wire connector	1	PC	
4	Adult Pads	1	Pair	These pads can be used repeatedly

Key Features

- this product is specially designed for the training of first aid personnel before using real AED. The model is a high simulation AED, which has the same shape as the real AED, and the operation process is the same as the real AED operation, so it is convenient to train the first aid personnel for AED training.
- Standard: AHA guidelines 2020
- it can cooperate with simulation human demonstration to intelligently detect whether to insert electrode piece.
- in the process of simulation scenario demonstration, different emergency states can be controlled by remote controller, which can simulate the insertion defibrillation rhythm, insertion non defibrillation rhythm, analog electrode sticking state, analog electrode bad, analog battery power shortage, analog patient movement, analog device failure, etc.
- it can meet the needs of teaching with playback function, adjustable volume, English languages,.
- it can select adult or child defibrillation mode, equipped with two kinds of electrodes for children and adults, which is convenient for teaching.
- there is a color screen on the front of the simulated AED, demonstrating the rescue.
