Catheter Insertion Male and Female

# Catheter Insertion Male and Female

Life Like female pelvis with interchangeable genitalia designed for practicing urologic and rectal access gastrointestinal care procedures.

## KEY FEATURES

- Realistic articulation enabling proper positioning for procedures.
- Interchangeable male and female genitalia.
- Genitalia have urinary connectors and reservoir for facilitation of urologic care procedures such as perineal care, insertion of vaginal medications and indwelling catheter insertion, care, irrigation and removal .
- Genitalia have anal connectors and colon reservoir for facilitation of Enema administration using fluid for realistic return.
- Comes with an abdominal plate with interchangeable stoma site allowing simulation of cystostomy tube care and urinary diversion stoma care.
- Single plug with valve in abdominal plate, used to pressurize the reservoir during urinary catheterization procedures.
- Bilateral thigh, dorsal gluteal and ventral gluteal
- IM injection is possible

## CONTAINS

- 1 Female Pelvis with Thighs
- 1 Male Genitalia
- 1 Female Genitalia
- 3 Urinary Connector Valves
- 3 Anal Connector Valves
- 1 Carry Case and Directions for Use
